

Barrel Clamp

Barrel Clamps - Known as "Barrel Clamp", this particular hydraulic accessory is actually utilized on lift trucks so as to clutch objects which you want to move with the forklift. Normally, they are utilized so as to handle kegs, paper rolls and barrels, together with a few barrel clamp designs having the ability to rotate the cargo. Like for instance, the revolving function enables a forklift operator to be able to insert a vertically stored paper inside the horizontal intake of a printing press.
