

## JLG Forklift Parts

JLG Forklift Parts - After retiring in the late 1960's, John L. Grove started out on a cross country RV trip. After spending numerous years establishing his family built crane business with his brother, John had no idea that this trip would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling equipment was the end consequence of a road trip.

All through their trip, John reacquainted himself with former business associates along the way. In combination with these conversations and a noteworthy event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a vast market for a product that could promptly and safely lift individuals in the air to accomplish upkeep and other building functions.

After returning from their trip, John set up a joint venture with two of his friends and bought a metal fabrication company in McConnellsburg, Pennsylvania. Opening with a small crew of twenty employees, they produced and sold their first JLG aerial work platform in 1970. The business incorporates some of the basic design elements of that original lift into current designs.

JLG lift trucks have come a ways since Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Today, the company proudly continues to expand itself into various markets worldwide and develops new products to make sure consumers are capable of being more effective and perform in the workplace within a safer environment.
