

Electrical Part for Forklifts

Forklift Electrical Part - Forklifts could be particularly labeled for use in hazardous locations. A marked lift truck denotes the design has met the least requirements of ANSI/UL 558 used for engine powered lift trucks or ANSI/UL 583 intended for electric trucks for the type of label placed.

Applications for marked lift trucks can be found in National Fire Protection Association NFPA 505 - Powered Industrial lift trucks including: Areas of Use, Maintenance and Operation, and Type Designations. Check with your local insurance provider and Fire Marshall for further information on the approved uses of industrial powered trucks in your application.

If the certain lift truck meets the outlined criteria, labels may be placed. A labeled forklift will show the type of designation put on the nameplate and would have a correctly corresponding label put.
