

Aerial Work Platform

Aerial Work Platform - There are numerous accessories for lift trucks which can be used so as to help expand the capabilities of your lift truck and allow you to pick up items, handle materials with greater ease or to finish clean-up tasks.

Many of the accessories are particularly designed to be able to fit on the forks themselves. Fork extensions for example, are used whenever you require more fork length, which increases lifting capacity. Blade extensions come in lengths varying from 48-120 inches. Triangular or rounded attachments are another type utilized whenever moving rolled material in order to ensure it does not roll off of the traditional flat blades.

Examples of lifting accessories consist of pivoting and telescoping crane or boom attachments. They could come in a number of different styles and are normally used for moving poles, metal bars, lumber and other kinds of bulky stuff. Other accessories such as different styles of hook plates and hooks are existing to be able to carry items utilizing a chain or sling. Magnetic lifters and slab lifters are other objects that can be used with hook attachments. Slab lifters are specialized attachments that are utilized for lifting a variety of materials which are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools which attach to your lift truck to make transferring rolls of carpet much easier. The attachment hooks onto the lift truck's forks and has a pole that goes through the middle of the carpet roll.

There are many other kinds of lift truck attachments which could be designed for facility maintenance like for instance snow blades. These forks attach to front end loaders and could move materials like for example dirt, soil and snow. Other common cleanup accessories consist of magnetic sweepers and standard sweepers. Standard sweepers consist of a broom which the lift truck blades connect onto for sweeping big spaces such as parking lots or warehouse and factory floors. The magnetic sweeper is similar except that it has a magnetic plate instead of bristles. The magnetic sweeper is utilized in places where there is lots of metal debris like on shop floors for example. Sweepers have widths as much as sixty inches and this surface area makes clean up effortless and fast.

A material spreader is another lift truck attachment which is usually used at facilities. These spreaders are useful for a range of applications like for example spreading rock salt, pellets, fertilizers, insecticides, seed and ice melt.

Work platforms are another optional lifting accessory which a lot of companies make use of everyday. The platforms range in size from 36" x 36" to up to 60" x 60". There are several units accessible that are capable of folding up and storing into a smaller space. Work platforms are designed to raise employees up to an overhead location making use of the lift truck. Larger platform units have added space for staff so as to bring tools and other necessary stuff intended for the task. Normally work platforms are made of steel or ploy material.
